BRAND IDENTITY GUIDELINES

FlowRight Plumbing

Residential & commercial plumbing services

Produced with Brand Studio · March 2026

01 — ABOUT FLOWRIGHT PLUMBING

FlowRight Plumbing provides same-day emergency repairs, bathroom renovations, and gas fitting across Sydney — licensed, insured, and guaranteed. No call-out fee, upfront pricing, and a lifetime warranty on all workmanship.

02 — BRAND STRATEGY

> *The only plumbers in Sydney who guarantee you'll never pay for a problem twice — with lifetime warranties on all work and transparent pricing before we touch your pipes.*

BRAND PROMISE

You'll know exactly what you're paying before we start, and if the same problem comes back, we'll fix it free — for life.

BRAND TRUTH

FlowRight is the only plumbing service in Sydney that stands behind their work with lifetime warranties, eliminating the customer's biggest fear: paying twice for the same problem.

PERSONALITY

- Dependable
- Straight-shooting
- Competent
- Reassuring

TONE

confident not cocky

transparent not overwhelming

reassuring not patronizing

03 — LOGO CONCEPT

FlowStream Mark — Combination

A dynamic abstract mark that captures the essence of perfect water flow through clean geometric lines. The mark suggests both the 'flow' of water and the 'right' direction through an elegant directional form that feels confident and dependable. It evokes the precision and reliability of expert plumbing work without resorting to obvious pipe or wrench imagery.

FLOWRIGHT

DARK

FLOWRIGHT

LIGHT

MARK

An abstract mark composed of three curved geometric elements that flow into each other, creating a sense of rightward movement and perfect flow. The mark is constructed from arrow-like arcs that suggest water channels or streamlined pipes, with each element slightly overlapping to create depth. The overall form creates a subtle arrow-like direction pointing right, reinforcing the 'FlowRight' concept while maintaining geometric simplicity.

WORDMARK

Set in Oswald Medium with slightly increased letter-spacing (0.05em) for better readability at small sizes. The 'F' and 'R' are emphasized through the natural weight of the typeface. No custom modifications needed — Oswald's industrial character perfectly matches the dependable, straight-shooting personality.

CONSTRUCTION

- Mark is built on a 48x48 unit square grid system with three overlapping curved elements
- Icon height equals exactly 1.2x the cap height of the wordmark
- Horizontal spacing between icon and wordmark equals half the icon width
- At sizes below 24px, the mark simplifies to two curved elements maintaining the flow gesture

USAGE RULES

Clear space

Minimum clear space equals the height of the icon on all sides — this ensures the mark always has proper breathing room

- Don't stretch, skew, or distort the proportions
- Don't change the brand colors or use unauthorized colors
- Don't add drop shadows, gradients, or effects
- Don't place on busy photographic backgrounds without a solid backdrop
- Don't separate the elements or rearrange the lockup
- Don't use the mark smaller than minimum sizes

Min size

Digital: 24px height for full lockup, 16px for icon-only. Print: 15mm height for full lockup, 8mm for icon-only

04 — COLOR SYSTEM

Forge Iron — Primary
`#203436` · rgb(45,52,54) · cmyk(17,4,0,79)
Primary brand color for logos, headers, and key messaging. Conveys strength and reliability without typical blue clichés

Copper Strike — Secondary
`#E17055` · rgb(225,112,85) · cmyk(0,50,62,12)
Secondary brand accent for call-to-action elements, highlights, and warmth. References quality copper piping

Safety Orange — Accent
`#FFC840` · rgb(255,200,110) · cmyk(0,20,57,1)
High-visibility accent for emergency services, warnings, and attention-grabbing elements

Midnight Steel — Dark
`#1A1D1F` · rgb(26,29,31) · cmyk(16,6,0,88)
Darkest neutral for text, deep backgrounds, and maximum contrast situations

Clean Slate — Light
`#F8F9FA` · rgb(248,249,250) · cmyk(1,0,0,2)
Light neutral for backgrounds, negative space, and creating breathing room

COLOR INTERACTION NOTE (ALBERS)

The Copper Strike orange appears more vibrant against the cool Forge Iron than against warm neutrals due to simultaneous contrast - this temperature opposition is the system's primary strength. Always pair warm and cool colors directly, never warm-on-warm without a neutral separator.

TAGLINES

"Fixed right the first time. Guaranteed for life."

"Why FlowRight is the last plumber you'll ever need to call"

"The only Sydney plumbers who guarantee you'll never pay twice"

"How to never worry about the same plumbing problem again"

DO

- Use specific numbers and guarantees (lifetime warranty, upfront pricing, 24/7 service)
- Acknowledge the customer's stress without being dramatic ("We know a burst pipe ruins your day")
- Lead with what makes us different before explaining what we do
- Write like you're talking to a neighbour who needs help, not a customer you're trying to impress

DON'T

- Don't use plumbing puns or jokes (customers in crisis aren't looking for entertainment)
- Don't oversell with superlatives like 'best', 'amazing', 'incredible' — let the guarantee do the talking
- Don't hide pricing or create mystery around costs — transparency builds trust

ELEVATOR PITCH

> I run FlowRight Plumbing here in Sydney. We're the only plumbers who guarantee you'll never pay for the same problem twice — every job comes with a lifetime warranty. No hidden fees, no surprises when we're done. Most of our customers are dealing with an emergency when they call us, so we focus on fixing it right the first time and making sure they never have to think about that problem again.

07 — UI DESIGN TOKENS

MOTION PRINCIPLES

- Enter animations use ease-out — elements decelerate as they arrive, feeling solid and dependable
- Exit animations use ease-in — elements accelerate as they leave, showing decisive action
- Duration reflects element size: buttons 159ms, cards 258ms, modals 358ms — quick and confident
- Stagger service items by 56ms per item — maximum 5 items to maintain professional rhythm
- Brand personality expressed in motion: Slightly snappier timing (159-258ms range) with subtle bounce easing for CTAs to reinforce competence and reliability without being playful
